SUMMARY

Informatics Engineering student who has a strong interest in software development and expertise in web application development. Currently have a passion for web development and started to explore it by creating responsive websites and building some REST APIs as well as a strong interest in Software Development. In addition, attended a full-stack JavaScript bootcamp and improved the skills of creating responsive websites using React.js and building backend applications using Node.js (Express.js) or PHP (Laravel).

PROJECT EXPERIENCE

Eduwork

Online, ID

Fullstack Developer - Project Internship

Nov 23 - May 10

- Improved user payment experience by reducing transaction errors by 30% through developing an online food ordering application using Node.js and React.js.
- Constructing a backend over 3 weeks with multi-level user features, access rights, payments, and carts.
- Implemented robust security measures, including JWT authentication and data encryption, to protect user data and enhance application security.
- Crafting an attractive frontend in 2 week to enhance responsiveness and attractiveness using ReactJS and Tailwind CSS
- Achieved a 95% project completion rate on time by independently managing the project timeline and deliverables using efficient personal workflow strategies.

CERTIFICATION & BOOTCAMP

Eduwork

Online, ID

MERN Stack - Bootcamp

Nov 23 - May 10

- Improved user payment experience by reducing transaction errors by 30% through developing an online food ordering application using Node.js and React.js.
- Constructing a backend over 3 weeks with multi-level user features, access rights, payments, and carts.
- Implemented robust security measures, including JWT authentication and data encryption, to protect user data and enhance application security.
- Crafting an attractive frontend in 2 week to enhance responsiveness and attractiveness using ReactJS and Tailwind CSS
- Achieved a 95% project completion rate on time by independently managing the project timeline and deliverables using efficient personal workflow strategies.

EDUCATION

STMIK ROSMA

Informatics Engineering

GPA 3.54

Karawang

Sep 2020 - Present

- **Relevant Study** : Web Programming, Data Structures
- **Organization** : HMTI (Himpunan Mahasiswa Teknik Informatika) Involvement (Active Member, Collaborated, Developed): Actively participated in organizing workshops as part of the HMTI, collaborating with peers to develop leadership and event management skills.

SKILLS, INTERESTS, & LANGUAGES

Technical Skills : Laravel | React js | Node js | MySQL | PHP | Html | CSS | Javascript | Tailwind CSS | C++ | Python | Git/Github | OOP | REST API | MongoDB | Go

Soft Skills : Problem Solving | Critical Thinking | Discipline | Teamwork

Interests: Backend Developer, Frontend React Developer, Laravel Developer

Language : Indonesian (Native), English (Beginner)

PROJECTS

Food Delivery

Mar 2023 –

Apr 2023

Details : E-commerce food ordering platform where users can order and pay for food online

Tools : React js, MongoDB, Node js, Midtrans

Link : <https://github.com/ArrzGerald/fooder>

Demo : <https://fooder-pi.vercel.app/>

Event Share

Jan 2023 – Feb 2023

Details : Website where users can create and share information about events they are organizing

Tools : Next js, Node js, MongoDB

Link : <https://github.com/ArrzGerald/frontend-event-app>

Demo : <https://sociale-lemon.vercel.app/>

Cashier POS System

Jul 2024 – Jul 2024

Details : Cashier website for small and medium-sized enterprises (SMEs) equipped with a POS system and QRIS payment system, enabling SMEs to easily analyze revenue and profit

Tools : Laravel, Inertia js, React js, Mysql, Midtrans

Link : <https://github.com/ArrzGerald/cashier-pos>
